Q.P. Code: 13324

Third Semester B.Com. (Regular/Tourism/LS/SP) Degree Examination, November/December 2019

(CBCS Scheme)

Commerce

Paper 3.6 - QUANTITATIVE ANALYSIS FOR BUSINESS DECISIONS - II

Time: 3 Hours] [Max. Marks: 70

Instructions to Candidates: Answer should be written in English.

SECTION - A

Answer any **FIVE** of the following questions. Each question carries 2 marks: $(5 \times 2 = 10)$

- 1. (a) What is the meaning of Positive and Negative Correlation?
 - (b) What is meant by Interpolation and Extrapolation?
 - (c) Write the meaning of Irregular variations.
 - (d) State the methods of non-probability sampling.
 - (e) It r = 0.6 and N = 64 find out the probable error.
 - (f) What is meant by Sampling?
 - (g) Expand $(y-1)^4$.

SECTION - B

Answer any **THREE** of the following questions. Each question carries 6 marks: $(3 \times 6 = 18)$

2. Find the Karl Pearson's coefficient of correlation between sales and advertising expenditure from the following data:

Sales (Rs. in lakhs): 65

65 66 67 68 69 70 71 72 73

Advertising Exp. Rs. in '000': 66 67 64 67 71 69 70 68 70

3. Estimate missing data from the following using Binomial Expansion formula:

Year: 2006 2007 2008 2009 2010 2011

Exports: 2,100 2,300 ? 2,800 3,000 3,500

Q.P. Code: 13324

- A box contains 5 white, 4 red and 8 black balls. Find out the probability of 4. getting a white or black ball in a single draw.
- Formulate X on Y regression line from the following data: 5.

40 32 38 42 36 46 X:

30 35 40 36 28 35

Calculate trend values by the method of 'least squares'. 6.

Year:

2009 2007 2008 2010 2006

124 118 120 136 100 Production in 000 units:

SECTION - C

Answer any THREE of the following questions. Each question carries 14 marks: $(3 \times 14 = 42)$

10 student obtained the following marks in Statistics and Accountancy Calculate 7. Rank correlation:

Marks in Statistics: 81 90 21 87 98 80 98 90 98

Marks in Accountancy: 75 73 85 70 76 82 65 76 68

Given the following data: 8.

> X: 1 2 3 5 1 1 3

Y: 6 0 0 1 1 2 5 1

- Fit a regression line of X on Y and Predict X if Y = 2.5(a)
- Fit a regression line of Y on X and Predict Y if X = 5. (b)
- Given below are the figures of production (tons) of a sugar factory: 9.

Year:

2005 2006 2007 2008 2009 2010 2011

Production Tons: 150 154 176 188 170 182 196 180

- Fit a straight line by 'Least Squares' method (a)
- Show the actual and trend line on a graph sheet and (b)
- Estimate the production for the year 2013. (c)
- By using Newton's Advancing Difference method estimate the number of persons earning wages between Rs.160 and Rs. 190 per day.

Wages per day Rs.: Below 140 140-160 160-180 180-200 200-220

Number of persons:

500

240

200

140

100

2012

Q.P. Code: 13324

11. From the following table, find out if there is any relationship between density of population and death rates:

Districts:	Α	В	C	D	E
Sq. Kilometers :	120	150	80	50	200
Total population :	24,000	75,000	48,000	40,000	50,000
No. of deaths :	288	1,125	768	720	650
